an analysis of the stomach reveals not the slightes; trace of poison. The conclusion reached is that death was due to natural causes. The report is regarded with suspicion from certain quarters.!

Many persons openly express the belief that Baron De Reinnels was murdered and the official report to the contrary does not shake their belief. Against all these, however, stands the reputation of Dr. Brouardel. Those who know him declare that nothing the government could offer him would induce him to attach his name to a false report, and if such report was

An Attempt Really Being Made to Over-

has been a day of suppressed excitement and anxiety in military circles here as tiere was every reason to believe the revolutionists would make an attack on Guererro, where a large quantity of arms and ammunition were store. There have been rumors of another engagement, however, about twenty miles south of San Mignel between 150 revolutionists and a detachments of eighty Mexican and a detachments of eighty Mexican and a detachments of eighty Mexican and a detachment of sighty Mexican and a detachment of suppression of their exploits, the scaling of Mt. Ararat, was one they have good reason to be proud of, they being the first and only Americans to reach the top. They journeyed through Turkey in Asia, China, then taking passage for home. They may complete the journey by wheeling home through southern California. has been a day of suppressed excitement have been rumors of another engagement, however, about twenty miles south of San Mignel between 150 revolutionists and a detachments of eighty Mexican soldiers, in which five soldiers were wounded. The announcement that General Extrada led the revolutionists who deteated the government troops yesterday created intense excitement as he is prominent in army circles and has a large following.

It is believed that an attempt is really being made to overthrow the government, and that it is to be a desperate one, not to be easily subpressed. It now seems there is a large detachment numbering probably 2,000 revolutionists on Mexican soil. Mexican troops will have to fight hard to subdue the revolutionists,

Seven wounded soldiers who were in the late Ignacio fight were brought to New Laredo last night. One thousand United States troops are now in the field along the river border between Laredo and Brownsville.

They journeyed through Turkey in Asia, Turkestan, Persia, Russia, China, then taking passage for home. They may complete the journey by wheeling home through southern Callifornia.

A BOUNDARY DISPUTE.

Costa Rien and Nicaragua Quarreling Over Disputed Territory.

dimensions, and hostilities may begin at any moment. The territory in question is but a few thousand square miles and would be worth little to Costa Rica should they anoulre it. Costa Rica, it is believed, therefore seeks merely an opportunity to impose on Nicaragua what seems favorable to her interests in matters affected by the canal. Should she succeed in provoking war she probably would triumph, for, although poor both in men and money, she is superior in both respects to Nicarauga.

LONDON, Dec. 28.—The Times publishes a letter from Protessor Max Muller remarking upon the researches of Profes Brugesch to prove the ratio of gold to silver in accient Egypt as 1 to 17%. Dr. Brandes has, he suds, proved that in Babylonia the ratio was always 1 to 11 1-32

Schnefer Defeats Vignaux. PARIS, Dec. 28.-In the single cushion carom billiard match for 409 points, Schaefer defeated Vignaux by 55 points in a game of 104 innings.

THE MONTEREY.

Next Week.

San Francisco, Dec. 28.—The official test of the new coast defense vessel Montercy will not occur until next week, as the contractors of the Union Iron works have determined to alter the pitch of her Berews for the purpose of obtaining a greater number of revolutions and thereby Brosks. developing increased horsepower. The developing increased horsepower. The vessel will go on the dry-dock tomorrow, and the present pitch of her propellers, which is 12% feet, will be decreased to about 11 % feet. The new war-ship was cruising on the bay for over six hours, and for four hours of that time was steaming at full power under forced draft. She demonstrated the fact that her machinery is canable of standing the most severe test that the government will require.

require.

During the entire run there was not the slightest mishap to at part of the machinery. Her maxim rerevolutions were 155 per minute, and the speed in those parts of course where the water was deepest it is estimated amounted to fourteen knots per hour. Some partial computations were made to determine the horse-power development, and these indicated about 5,200, which is 200 less than the contract requirement.

power development, and these indicated about 5,200, which is 200 less than the contract requirement.

The official trial would probably have precurred today as all the members of the mayal board were present had it not been that the builders became convinced after a thorough test of the vessel's capacity that by decreasing the pitch of her screws greater development of horse power would be obtained, which would result in the builders receiving a premium on horse-power in excess of the required 5,400. All doubt as to the espablity of her coll of boilers to hold the necessary amount of sleam was removed by her performance today and naval experis pronounced the experiment entirely successful.

Noally all the time that the monetary was running at a high rate of speed the safety valve was blowing off sleam indicating that the boilers were making more steam than could be supplied to the engines. The average revolutions today were 148 or 148 and these were made with a steam pressure of 100 pounds.

able to the government. The report that the town of Caseros has been captured turns out to be without foundation. Insurgents, numbering 1,500 men, made four assaults upon the town but were repulsed with heavy losses by the garrison of 500 men.

WORLD'S BICYCLE TOUR.

Two Young Men Have Just Completed

him would induce him to attach his name to a false report, and if such report was secretely decided upon, he would not in any way be a party to it. The report was eagerly discussed and is taken to end the question as to the baron's death. The De Reinach family, it is supposed, will accept the report as final as it removes from the baron the stigma of suicide.

SAN FRANCISCO, Dec. 26.—W. H. Sachtleben of Alton, Ilis., and Thomas Allen of Ferguson, Mo., have arrived here after making a tour of the world on bicycles. After graduating from Washington university, St. Louis, in 1890, on June 23, they sailed from New York, landing in Liverpool July 4. There they purchased SAN FRANCISCO, Dec. 28 .- W. H. Sachmaking a tour of the world on bicycles, question as to the baron's death. The De Reinach taunity, it is supposed, will accept the report as final as it removes from the baron the stigma of soicide.

Tousebuilding Is An Art.

That has been practiced among men for a considerable time, and one which we should think might fairly be expected to have reached a reasonable degree of perfection. And so it has. Yet who is there that has not known of houses which have taken fire from "defective flues"? This leads us to emphasize again the importance to you of the good mason who is a'so the honest man. We are not altogether disinterested in this. Good chimneys, good flues and stove men, are good friends. We wish you, in your interest as well as our own, to have a Jewel Range and although the Jewel Range is superior to other ranges, it is not superior to physical laws, and needs to be he ped by a good draught, such as is secured only by a properly built chimney. Therefore, we say, make sure of the good mason!

And also, make sure of the Jewel Range. It will last you longer and serve you better than any other range that is made. As years go by it will cost you least for repairs. It ought to be in every house in Salt Lake -in Utah-in this whole country. Wherever there is a house without it, that house would be better with it. Ranges have been greatly improved of late years, and the Jewel Range is the result of the advances that have
